Enumbra

More than a blockchain, a simplified future

Concept

Problems

Solution

Enumbra

- **Type**: Coin
- **Symbol:** ENB
- **Algorithm:** ENUM(Proof of Stake)
- **Total Supply:** 3 499 050 621
- **Circulating Supply:** 2 869 221 509

Benefits

- **Instant and Decentralized**
  - Nodes spread globally allows transactions to take less than 2 seconds.
- **Mobile payments in mind**
  - Lets users take advantage of a cutting-edge blockchain to buy food, pay tolls or transfer money between themselves.
- **Micro-payments Friendly**
  - Supports any payment value with an associated cost of less than a cent.
- **Scalable**
  - Proven algorithm to surpass Visa number of transactions per minute.
- **Traceable**
  - For service providers, know when/where your public target is spending their money and which items, allowing customisation, service improvement and inventory tracking/forecast.
- **Eco-friendly**
  - Proof of Stake doesn't require mining rigs, therefore not huge amounts of energy are spent to keep Enumbra working.
- **Sustainable Future**
  - Dedicated development, marketing and advisor team to ensure Enumbra future.

Use Cases

Coffee Machines

Vending Machines

Tobacco Machines

Car wash

Parking Meters

Laundry Machines

Ticket Machines

Highway tolls

PRE-ICO

- **Start of Pre-ICO:** 28 Feb-15 March 2018
- **Duration:** 15 days
- **Initial Value:** 0.01$ => 100 ENB => 1$
- **Exchange rate:** 1 ETH <=> 87 400 ENB
- **Soft-Limit:** 30 000 000 ENB
- **Hard-Limit:** 120 000 000 ENB
- **Pre-ICO Distribution:** 168 000 000 ENB
- **Bonus(Pre-ICO):** 40% bonus

Distribution

- 🔵 Development — 18%
- 🟢 Early Investors Pre-ICO — 45%
- 🟡 Bounty Programs — 5%
- 🔴 Marketing — 10%
- 🟣 Fund Reserve — 16%
- ⚫ Legal Advisors — 5%
